EXPLORING DMART SALES

&
UNDERSTANDING KEY FIELDS

SPRINT 1 – DAY 1

Presented By:
Huda Ansari

Subject:
Data Analysis / Business Analytics

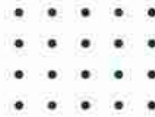

Date:
May 2025

Turning Data into
Smarter Decisions

DMart is one of India's leading retail supermarket chains, offering a wide range of quality products at affordable prices.

Every day, DMart stores generate large amounts of sales data from different products, customers, and locations.

In this sprint, we explored the DMart sales dataset and understood important fields along with business analysis techniques that help in solving problems and making better decisions.

OBJECTIVES OF DAY 1

- ✓ To explore DMart sales dataset
- ✓ To understand key fields in the dataset
- ✓ To learn business analysis techniques
- ✓ To understand how these techniques help businesses

The dataset contains transactional sales information from DMart stores across different locations.

KEY FIELDS (COLUMNS)

Order ID

Unique order identifier

Order Date

Date on which order was placed

Product Name

Name of the product

Category

Category to which product belongs

Quantity

Number of units sold

Sales (₹)

Total sales amount

Profit (₹)

Profit earned on the sale

Region

Region / City of the store

SAMPLE DATASET (FIRST 10 RECORDS)

Order ID	Order Date	Product Name	Category	Quantity	Sales (₹)	Profit (₹)	Region
1001	01-01-2024	Rice	Grocery	5	1,200.00	150.00	Mumbai
1002	01-01-2024	Sunflower Oil	Grocery	1	230.00	28.75	Delhi
1003	02-01-2024	Biscuits	Snacks	3	90.00	10.80	Pune
1004	02-01-2024	Shampoo	Personal Care	2	180.00	22.50	Bengaluru
1005	03-01-2024	Washing Powder	Home Care	1	145.00	18.25	Hyderabad
1006	03-01-2024	Toothpaste	Personal Care	4	220.00	26.40	Mumbai
1007	04-01-2024	Masoor Dal	Grocery	2	160.00	20.00	Delhi
1008	04-01-2024	Tea	Beverages	2	120.00	15.00	Pune
1009	05-01-2024	Chips	Snacks	5	75.00	9.50	Bengaluru
1010	05-01-2024	Dishwash Liquid	Home Care	1	130.00	16.25	Hyderabad

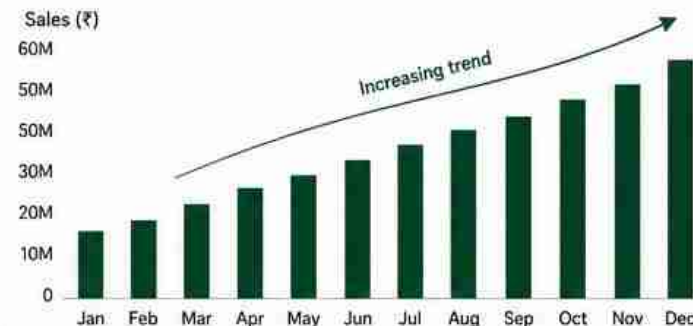

DATASET OVERVIEW

Total Records	50,000+
Total Columns	8
Date Range	Jan 2024 - Apr 2025
Total Categories	12
Total Regions	6

SALES BY CATEGORY

SALES TREND (MONTHLY)

KEY OBSERVATIONS

High sales in Grocery category

Sales showing consistent monthly growth

Strong performance across major regions

Wide range of products contributing to overall business

04

BUSINESS ANALYSIS TECHNIQUES LEARNED

During Sprint 1, we learned important techniques used to understand problems, gather insights and make data-driven decisions.

5W TECHNIQUE

Understand a situation by asking five basic questions.

5 WHY TECHNIQUE

Drill down into a problem by asking "why" five times.

SWOT ANALYSIS

Evaluate strengths, weaknesses, opportunities, and threats.

BCG MODEL

Analyze business units based on market share and growth.

These techniques help in understanding the business better and solving real-world problems.

05

WHAT IS 5W TECHNIQUE?

The 5W technique is used to understand a problem or situation by asking five basic questions.

QUESTION	PURPOSE
? WHAT?	What is the problem or situation?
? WHY?	Why did it happen?
? WHO?	Who is involved or affected?
? WHERE?	Where did it happen?
? WHEN?	When did it happen?

EXAMPLE (IN DMART SALES)

- What products have low sales?
- Why are sales decreasing in a category?
- Who are the target customers?
- Where are the sales lowest?
- When do sales drop the most?

The 5 Whys technique is used to find the root cause of a problem by repeatedly asking “Why?” until the underlying cause is identified.

Steps to Follow:

- ✓ Identify the Problem
- ✓ Ask “Why?” the First Time
- ✓ Ask “Why?” Again
- ✓ Ask “Why?” Repeatedly
- ✓ Find the Root Cause

Example: Production Delay

Why? Machine Breakdown

Question	Purpose
What	Identify the issue
Why	Understand the cause
Where	Locate the problem
When	Determine the timing
Who	Identify who is involved

Helps Find the Root Cause

07 WHAT IS BCG MODEL?

The BCG (Boston Consulting Group) Matrix is a business analysis tool used to evaluate products or business units us:

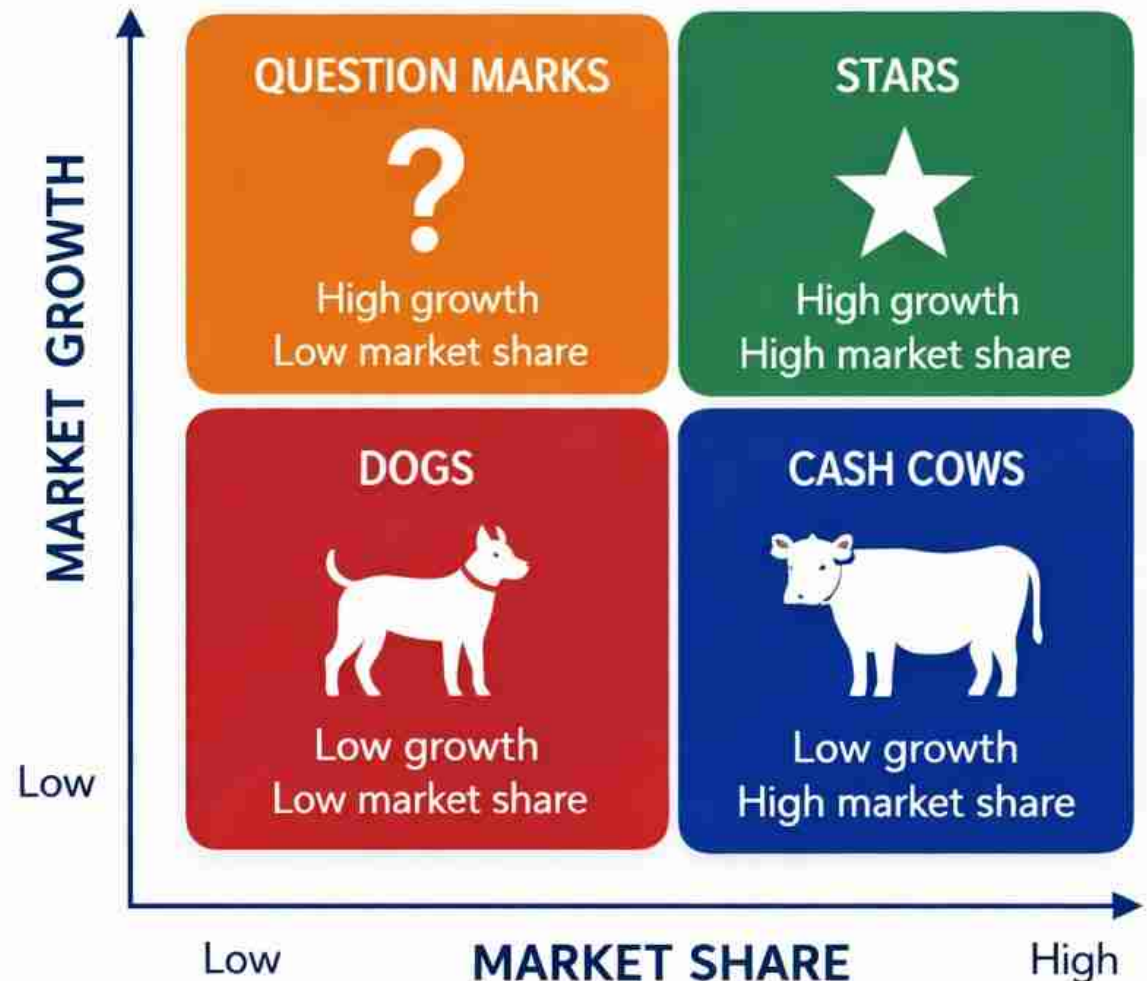

- Market Growth
- Market Share

It helps companies decide where to invest and which products need improvement.

EXAMPLE IN DMART

-  Daily grocery products → Cash Cows
-  Trending products → Stars
-  New product launches → Question Marks
-  Poor-selling products → Dogs

BCG MATRIX

Solve problems effectively

Understand customer behavior

Improve business decisions

Analyze sales performance

Identify business opportunities

Companies like DMart use these techniques for strategic planning, better operations, customer satisfaction and business growth.
