

CLEANING AND STRUCTURING RETAIL DATA

— USING TABLES —

DAY 4 ACTIVITY REPORT

PRESENTED BY:
HUDA ANSARI

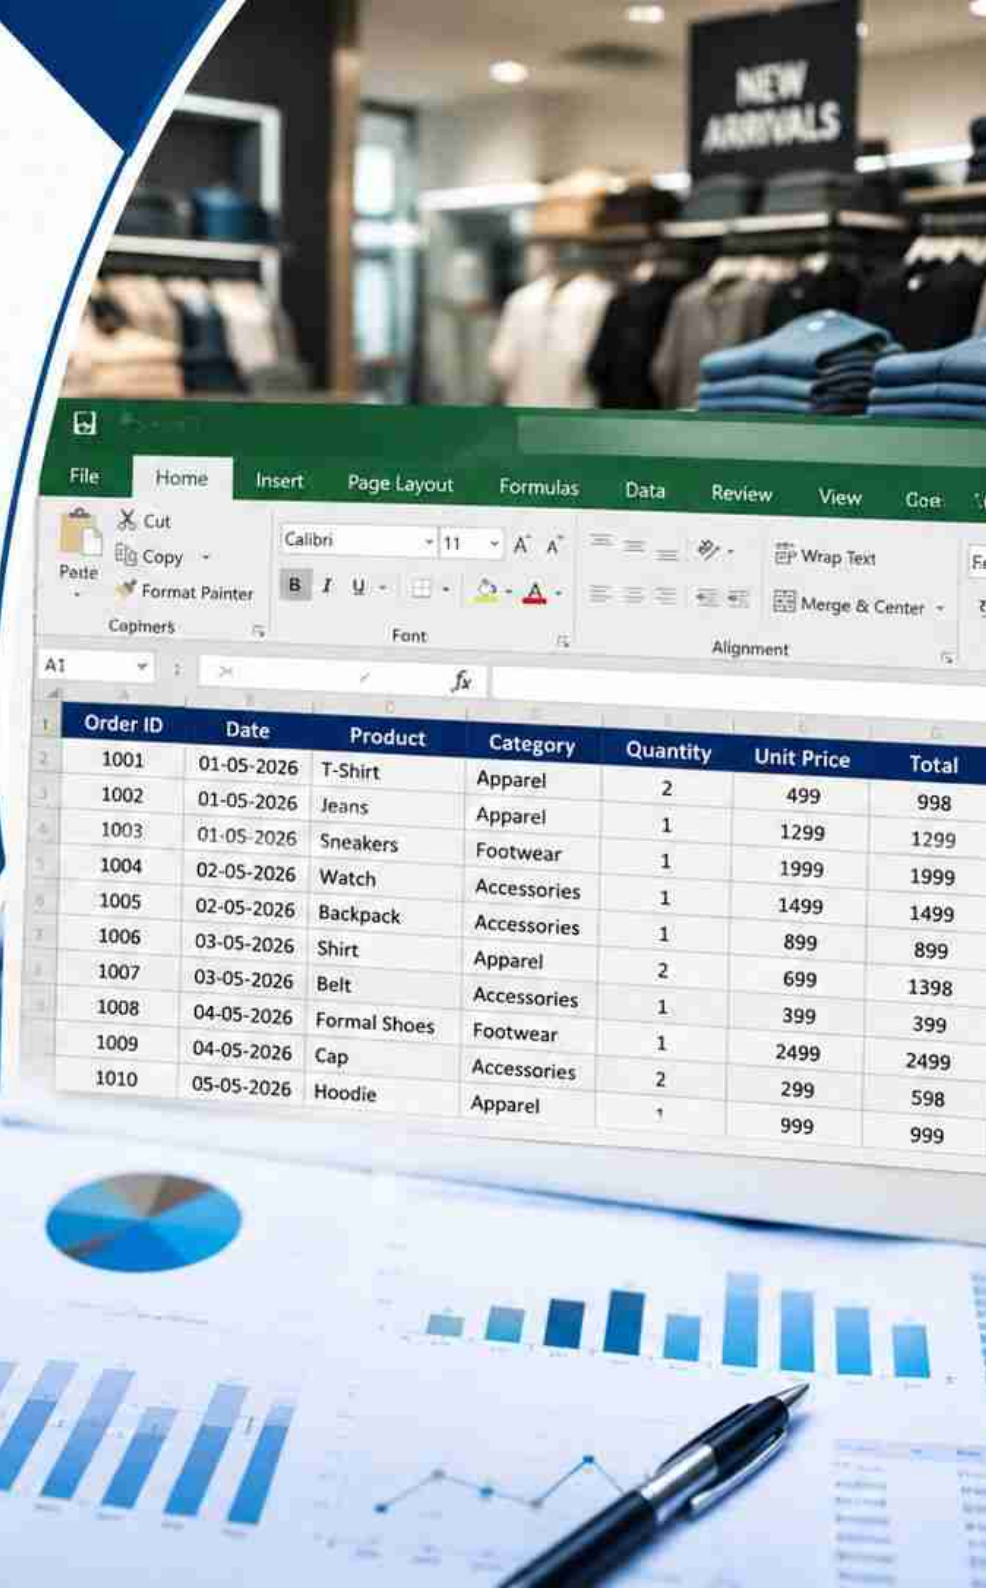

MICROSOFT EXCEL

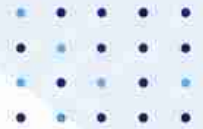

DATA CLEANING

DATA
STRUCTURING

INTRODUCTION & PREVIOUS LEARNING

INTRODUCTION

Retail businesses generate **large amounts of data** daily.

Raw data may contain **duplicates, errors, and missing values.**

Data cleaning improves data **accuracy** and **organization.**

PREVIOUS LEARNING REVISED

Basics of Microsoft Excel

SUM, AVERAGE, MIN, MAX

COUNT and COUNTIF

Sorting and Filtering

Table Formatting

OBJECTIVES & TOOLS USED

OBJECTIVES

Clean retail data

Remove **duplicate** entries

Structure data into **tables**

Improve **readability** and **analysis**

TOOLS USED

Microsoft Excel

Format as Table

Sort and Filter

Remove Duplicates

Text Functions

DATA CLEANING & STRUCTURING PROCESS

Steps followed to clean and structure retail data using Microsoft Excel

STEPS PERFORMED

- 1**  **Opened Retail Dataset**
Loaded the retail dataset in Microsoft Excel.
- 2**  **Checked Missing Values**
Identified blank or missing values in the dataset.
- 3**  **Removed Duplicate Records**
Used Remove Duplicates to delete repeated entries.
- 4**  **Corrected Formatting Issues**
Fixed inconsistent text, extra spaces, and data formats.
- 5**  **Organized Rows & Columns**
Arranged data properly and ensured consistent structure.
- 6**  **Converted to Structured Table**
Applied "Format as Table" for better data management.
- 7**  **Applied Sorting & Filtering**
Sorted and filtered data to make it easier to analyze.

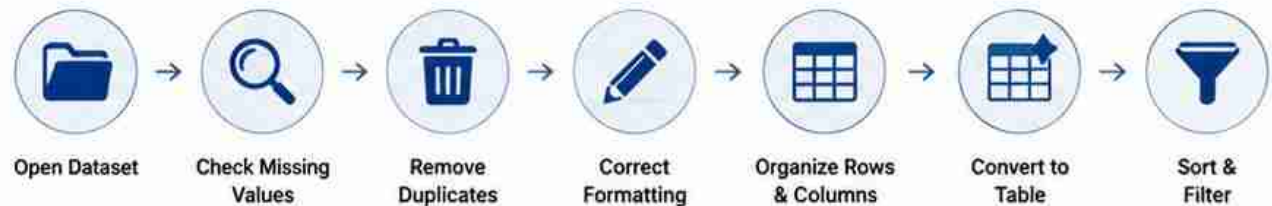

BEFORE CLEANING

Order ID	Date	Product	Category	Qty	Price
1001	01-05-2026	T-shirt	Apparel	2	499
1002	1-5-2026	Jeans	apparel	1	1299
1002	01/05/2026	Jeans	Apparel	1	1299
1003	02-05-26	Sneakers	Footwear	one	1299
1004	02-05-2026	Watch	Accessories	1	1999
1005	03-05-2026	Backpack	Accessories	1	1499
1006	03-05-2026	Shirt	Apparel	2	899
	03-05-2026	Belt	Accessories	1	699
1008	04-05-2026	Shoes	footwear	1	399
1009	04-05-2026	Cap	Accessories	2	2499
1010	05-05-2026	Hoodie	Apparel	1	999

AFTER CLEANING

Order ID	Date	Product	Category	Quantity	Unit Price
1001	01-05-2026	T-Shirt	Apparel	2	499
1002	01-05-2026	Jeans	Apparel	1	1299
1003	02-05-2026	Sneakers	Footwear	1	1299
1004	02-05-2026	Watch	Accessories	1	1999
1005	03-05-2026	Backpack	Accessories	1	1499
1006	03-05-2026	Shirt	Apparel	2	899
1007	03-05-2026	Belt	Accessories	1	699
1008	04-05-2026	Shoes	Footwear	1	399
1009	04-05-2026	Cap	Accessories	2	2499
1010	05-05-2026	Hoodie	Apparel	1	999

PROCESS FLOW

RESULT

The data is now clean, consistent, and well-structured, making it easy to analyze and generate accurate insights.

BENEFITS & REAL-WORLD IMPORTANCE

BENEFITS

Better Organization

Structured tables keep data organized and easy to manage.

Faster Analysis

Clean and structured data allows quick calculations and insights.

Improved Accuracy

Removing errors and duplicates ensures reliable and accurate results.

Easy Filtering & Sorting

Structured tables make it simple to filter, sort, and find useful information.

REAL-WORLD IMPORTANCE

Used in Retail Management

Clean data helps retail businesses manage sales, customers, products, and inventory effectively.

Helps in Decision-Making

Accurate and organized data supports better business decisions and planning.

Supports Sales & Inventory Analysis

Structured data helps track performance, analyze trends, and optimize stock levels.

CONCLUSION

Data cleaning is essential for accurate analysis.

Structured tables improve efficiency and readability.

Excel tools help manage retail data professionally.

The activity improved **practical Excel** and data management skills.

Clean data. Structured data. Better decisions.
That's the **power of good data management!**
